

NAGENDRA KUMAR

Java Full Stack Developer | SDET Engineer

+91 7095880269 nagvenky57@gmail.com Bangalore NAGENDRA KUMAR

CAREER OBJECTIVE

Motivated and detail-oriented Java Full Stack Developer with hands-on experience in building scalable web applications using Java, Spring Boot, React.js, and MySQL. Skilled in developing RESTful APIs, authentication systems, responsive user interfaces, and real-time business applications. Experienced in deploying applications using modern cloud platforms and integrating frontend with backend services. Passionate about clean code, problem-solving, and delivering user-centric applications.

EDUCATION

Bachelor of Computer Science

Sri Hari Degree College

April 2020 – June 2023

Board of Intermediate Education

Sri Y.S.R.M Junior College

June 2018 – March 2020

TECHNICAL SKILLS

- **Programming Languages:** Java
- **Web Technologies:** HTML, CSS, JavaScript, React
- **Frameworks and Libraries:** Spring Boot
- **Databases:** MySQL, Supabase
- **Version Control:** Git

PROJECTS

Little Elly School ERP System | Java Full Stack Developer

Mar 2026 – Apr 2024

Tech Stack: Java, Spring Boot, React.js, MySQL, Supabase, REST APIs

- Developed a complete real-time School ERP platform for managing school operations and student activities.
- Built scalable backend services using Spring Boot and RESTful APIs for authentication, student management, admissions, and fee management.
- Designed responsive frontend interfaces using React.js for admin dashboards and school management modules.
- Implemented secure login authentication and role-based access control for administrators.
- Integrated frontend and backend APIs with optimized database operations for faster performance.
- Deployed frontend, backend, and database services using Hostinger, Render, and Supabase.
- Improved user experience with responsive UI components and real-time data updates.

Professional Experience

Wipro – SDET Engineer

Jan 2025 – Present | Bangalore, India

Responsibilities

- Developed and maintained automated test frameworks using Java, Selenium WebDriver, TestNG, and Cucumber BDD.
- Created End-to-End (E2E) test automation scripts for enterprise web applications to improve regression testing efficiency.
- Designed reusable automation utilities and page object models (POM) to enhance maintainability and scalability.
- Worked closely with developers and business teams in Agile/Scrum environments for sprint planning and defect tracking.
- Automated UI and functional test cases for React.js frontend applications and validated backend REST APIs.
- Implemented BDD test scenarios using Gherkin syntax with Cucumber for better collaboration between technical and non-technical teams.
- Performed API testing and validation using Postman and integrated automation suites into CI/CD pipelines.
- Participated in defect analysis, root cause identification, and quality assurance activities to improve application stability.
- Validated frontend functionality, user workflows, authentication modules, and database-driven operations.

Technologies Used

Java, Selenium WebDriver, TestNG, Cucumber BDD, React.js, Spring Boot, REST APIs, MySQL, Git, Postman, Agile, Maven
